MINIRETO 1: Nicolas Leria

1. Crea la carpeta GestorTareas e inicializa un repositorio Git.
2. Crea dos archivos: README.md y funciones.txt.
3. Realiza al menos 3 cambios separados y coherentes.
4. Antes y después de preparar cada cambio, consulta el estado del repositorio.
5. Registra cada cambio en un commit distinto aplicando las buenas prácticas: un commit debe asociarse a una idea, describir qué cambia con un mensaje breve y claro.
6. Consulta el historial completo y resumido e identifica el orden de los commits.

Primero creo una carpeta "GestorTareas" e inicio con un git init. seguidamente creo dos archivos, un "README.md" y un "funciones.txt". realizo un cambio escribiendo "cambio1" consultando el estado con las respectivas funciones "git status", "git add .", "git commit -m" y "git log". A su vez cada commit se diferencia con su propio nombre como el primero siendo "primercambio". Por ultimo consulto el historial identificando el orden de cada commit.

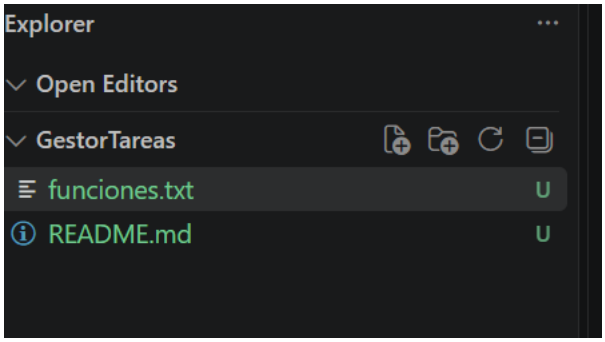

Capturas de pantalla a continuacion con sus demostraciones.

Crear carpeta Gestor Tareas y iniciar repositorio git:

```
C:\Users\nicol\OneDrive\Desktop\apps\GestorTareas>git init
Initialized empty Git repository in C:/Users/nicol/OneDrive/Desktop/apps/GestorTareas/.git/
```

Crea dos archivos: README.md y funciones.txt.

Primero hago un git init

Git status

git add .

Git commit –m"PrimerosCambios”

Git log

```
C:\Users\nicol\OneDrive\Desktop\apps\GestorTareas>git init
Initialized empty Git repository in C:/Users/nicol/OneDrive/Desktop/apps/GestorTareas/.git/
```

```
C:\Users\nicol\OneDrive\Desktop\apps\GestorTareas>git status
On branch master
